

TDPUD Water-Efficient Toilet Rebate Application

ACCOUNT INFORMATION

Account Holder Name _____ Owner _____ Landlord _____ Tenant _____
TDPUD Account # _____
Service Address _____ Truckee, CA _____
Street _____ Zip _____
Mailing Address _____
Street _____ City, State _____ Zip _____
Phone _____ Email _____

Rebates issued to the Account Holder will be applied as a one-time credit on your TDPUD account and appear on your billing statement. Credits are typically applied within 6 to 8 weeks of application submission. A bill credit will only be applied to active accounts. *Payments to others must be authorized by account holder by completing the Payment Release Authorization below.

*PAYMENT RELEASE AUTHORIZATION

COMPLETE THIS SECTION ONLY IF PAYMENT IS GOING TO SOMEONE OTHER THAN THE ACCOUNT HOLDER NOTED ABOVE.

Name to which check will be payable _____ Phone _____

Mailing Address for Other _____
Street _____ City, State _____ Zip _____

Payments to others will be made by check and are typically issued within 6 to 8 weeks of application submission.

PRODUCT INFORMATION

Toilet Gallons per Flush (GPF)		# of toilets	Purchase Date	Cost	Rebate
Existing [†]	New				
3 GPF or greater	1.28 GPF or dual flush ^{††}				\$100
1.6 GPF	1.28 GPF or dual flush ^{††}				\$25

[†] See reverse side for info about determining GPF ^{††} dual flush=effective flush volume 1.28 GPF or less

PROGRAM RULES & REQUIREMENTS

- Attach proof of decommissioning of old toilet (details on opposite side):
Photo _____ Landfill Receipt _____ Contractor Invoice _____ Porcelain piece from tank _____
Attach dated sales receipt with toilet(s) clearly identified.
- Applicant must be a District water customer to qualify for the toilet rebate.
- Rebate application must be received within 90 days of purchase or contractor invoice
- Customer agrees to allow verification of efficiency & installation by an authorized District representative if requested.
- **Limit 3 toilet rebates** per TDPUD water account.
- Rebate not to exceed the cost of equipment.

TERMS & CONDITIONS

TDPUD disclaims all liability from taxes incurred or any property damage or loss that may arise as a result of the applicant's participation in this program. This rebate offer may be discontinued or modified at any time by the TDPUD.

Applicant certifies that the above noted equipment is installed and will remain at the TDPUD service address on this application.

I have read, understand and agree to abide by the program rules, requirements and terms & conditions. I certify that the information provided on this application and associated required documentation is true and correct.

Account Holder's Signature _____ Date _____

For Utility Use Only

TDPUD Water-Efficient Toilet Rebate

The TDPUD Water-Efficient Toilet Rebate Program encourages customers to change out their old, high-water using toilets to new, lower water use toilets. Many “older” homes and businesses (pre-1995) still have high-water use toilets that use between 3 and 7 gallons per flush (GPF). In 1995 the Federal toilet standards went into effect requiring toilets installed in new construction to use 1.6 gallons of water per flush or less. Recent advancements have allowed toilets to use 1.28 gallons per flush or less while still providing equal or superior performance. Beginning January 1, 2016 the California Title 20 appliance standard requires toilet to be 1.28 gallons per flush or less. This is 20 percent less water than the current 1.6 GPF federal standard.

This rebate of up to \$100 will help TDPUD water customers upgrade their toilets and use less water.

How can I determine the Gallons per Flush (GPF) of my old toilet? †

- If your home was built prior to 1995, then you likely have a toilet that uses 3 gallons or more per flush:
 - For older toilets, the GPF capacity may be stamped on the inside of the tank, or underside of the tank lid or there may be a date stamp inside the tank or on the underside of the tank lid- 1994 or earlier suggests 3 GPF or greater.
 - Does the tank look like it would hold three or more 1-gallon milk containers?
- Generally, newer toilet's gallons per flush are printed on the porcelain directly behind the seat, inside the tank or on the tank lid.

How can I provide proof that the old toilet has been decommissioned?

- You may provide a photo of the old toilet clearly showing it has been removed and made inoperable.
 - You may provide a receipt from the landfill itemizing the number of toilets disposed of.
 - If applicable, provide a receipt from a licensed professional for removal and installation of toilet.
 - You may provide a small piece of porcelain from the tank of the removed toilet (placed in a plastic bag).
-

Did You Know?

- The average family uses more than 300 gallons of water per day.
- Toilets account for more than 25% of daily water use for an average family.
- Replacing a non-efficient toilet with a 1.28 GPF toilet can save 45 gallons per day.
- A warped or poorly fitted toilet flapper can waste up to 200 gallons of water per day.
- A toilet that is constantly running can waste up to 300 gallons of water an hour.
