

It's time to

winterize

← yes!

STOP WATER LEAKS · SAVE MONEY

(See reverse side for additional information)

Revised September 2016

To **avoid water leaks** and **SAVE** money, **WINTERIZE*** your irrigation system and vacation home.

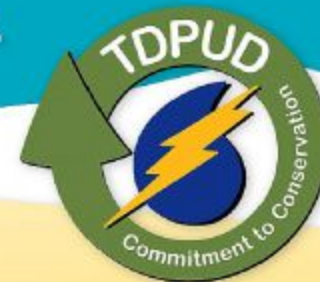

It's VERY important to:

- Ensure stop-and-drain valves are turned **completely on** or **completely off!** Valves that are not in the correct position may leak **tens of thousands of gallons** of water per month. Please contact your licensed professional for details and visit our website to read our "**water meter - stop and drain instructions.**"

**Contact a licensed professional to learn how to winterize your home safely.*

What can YOU do? Watch your water.

- TDPUD has a **online tool** to allow customers to view their water usage and detect continuous flow alarms.
- Visit **tdpud.org** and use the first four letters of your last name and TDPUD account number for secure login.

Stop Water Leaks, Watch Your Water Use, and Save MONEY!
